

Stop dealing with unstable adjustment blocks and inadequate foot holders.

- Total Joint and Sports Medicine Applications
- Enables MIS Techniques
- Does Not Impair Posterior Tibial Translation during ACL Fixation
- Pivot of Tibia Unrestricted for Anterior Retraction
- Variable Fixed Flexion Angles
- Compatible with Knee Arthroscopy
- Hands-Free Isolated Varus and Valgus Stress to Assist Collateral Ligament Reconstruction and Meniscus Repair
- No Hidden Cavities or Recesses to Hide Organic Debris
- Low Profile Mounting System
- Made in USA

Industry only

***Most Versatile  
Most Sterile  
Best Support***

***Unmatched Durability and Ease of Use.***

***Solorail***

**MIS Applications**

***PIVOT BOOT / ARC RAIL***

- Complete internal/external rotation
- Allows for full distraction aiding in instrument/implant insertion
- Allows for proper femur/tibia alignment

**Smooth Travel**

***RAIL SYSTEM***

- Full flexion and extension
- Precision adjustment
- Aircraft grade anodized aluminum resists dents and dings

**Autolock Foot Support**

***HANDS-FREE***

- Easy foot-release latch
- Release foot holder without losing flexion angle

**Optimized**  
***FOOT STABILIZER***

- Profile allows for tighter wrap and greater foot stabilization
- Lateral and medial support during flexion adjustment
